PROFESSIONAL SUMMARY

AI Product Manager with 8+ years of experience across product management, EdTech, content strategy, project execution, product operations, and AI-enabled workflow automation. Translates complex business and user problems into product strategy, requirements, workflows, user stories, acceptance criteria, and execution plans. Combines product discovery and cross-functional delivery with hands-on work across UX, AI/model decisions, evaluation, analytics, testing, and implementation.

CORE AI AND PRODUCT CAPABILITIES

AI Product Management | Product Management | Product Strategy | Product Discovery | Product Execution | Product Operations | Project/Program Execution | Content Strategy | EdTech and Academic Workflows | User Research | Roadmaps and Prioritization | PRDs and Acceptance Criteria | Generative AI and LLM Workflows | Human-in-the-Loop Systems | AI Evaluation | Experimentation | Product Analytics | Workflow Automation | UX Collaboration | Agile Delivery | Stakeholder Management

PROFESSIONAL EXPERIENCE

Physics Wallah - *Manager, Product (Platform & Execution)* | May 2023 - Present

- Own product execution for educational platforms and internal workflows, translating business and user needs into product specifications, user stories, acceptance criteria, and prioritized delivery plans.
- Lead product discovery, requirements, workflow design, UX decisions, testing, and iteration for AI-enabled and operational products.
- Coordinate managers as evaluators and teammates as testers, using structured feedback and validation to guide product decisions.
- Partner across product, design, operations, and technology to move initiatives from problem definition through delivery and review.

Unacademy (Incounse) - *Associate Manager, Product* | April 2021 - April 2023

- Owned roadmap execution for interactive 3D visualization capabilities supporting digital learning experiences.
- Established continuous student-feedback and usage-review workflows to inform backlog prioritization and product iteration.
- Implemented dynamic QR-based digital integrations and contributed to sprint planning, demos, retrospectives, and cross-functional delivery.

Yami Cosmo Services Pvt. Ltd. - *Co-Owner, Product & Operations* | June 2019 - March 2021

- Led product and operations planning across service delivery, process improvement, and customer experience.
- Identified workflow constraints, prioritized operational improvements, and coordinated delivery across business needs.

BYJU'S - *Content Strategist, Product Support* | July 2017 - June 2019

- Designed structured content workflows with documentation, validation, and quality-control checkpoints.
- Collaborated across teams to maintain content consistency, quality standards, and release readiness.
- Supported blended digital learning experiences through content strategy, product support, and operational execution.

SELECTED AI PRODUCT EXPERIENCE

AI Video Solution Generator - *AI Product Manager* | March 2026 - Present

- Initiated and led a faculty-reviewed workflow from source/question paper through AI processing, extraction, solution matching or generation, video generation, human review, and final output.
- Owned discovery, requirements, workflow and UX/UI decisions, AI/model decisions, testing, evaluation, and end-to-end validation.
- Contributed directly to implementation through AI-assisted development while coordinating manager evaluation and teammate testing.

Workforce Operations Platform - *AI Product Manager* | June 2026 - Present

- Initiated and defined a role-aware product for faculty, managers, and DTP users spanning attendance, time, projects, approvals, reporting, and productivity workflows.
- Owned requirements, workflow architecture, UI/UX, data interlinking, AI-related functionality, testing, and validation.
- Contributed directly to the TypeScript application, including authenticated workflows, role-based controls, reporting, and AI efficiency/costing views.

QPG Tagging Automation - *AI Product Manager*

- Designed the DTP and faculty workflow for DOCX/PDF question ingestion, controlled Chapter/Topic/Subtopic/category tagging, and bulk video-solution attachment.
- Designed preview, validation, dry-run, and explicit write controls so AI proposals remain bounded by approved taxonomy choices and accountable human review.

Leaderboard Generator - *AI Product Manager* | August 2026 - Present

- Initiated, designed, and built a local Python/Streamlit product that converts variable spreadsheet inputs into editable PowerPoint result decks.
- Designed schema handling, ranking and tie rules, analytics, presentation modes, batch processing, and automated correctness and layout validation while keeping student data local.

EDUCATION

MBA, Liverpool Business School (UpGrad) | **Bachelor of Life Science**, University of Delhi

CERTIFICATION

Fundamentals of Agents - Unit 1, Hugging Face Agents Course, issued 11 August 2026

TOOLS AND TECHNICAL FLUENCY

Python | TypeScript | React | Next.js | Streamlit | LLM integrations | RAG concepts | APIs | Data workflows | SQL/data modeling | Git/GitHub | Vercel | Figma | Jira | Miro | Microsoft Excel | PowerPoint | Google Workspace

Languages: Tamil (Native), Hindi, English
