

SUMMARY

AI Product Manager with overall 8+ years of experience across product management, EdTech, content strategy, project execution, product operations, and AI-enabled workflow automation. Translates complex business and user problems into product strategy, requirements, workflows, user stories, acceptance criteria, and execution plans. Combines product discovery and cross-functional delivery with hands-on work across UX, AI/model decisions, evaluation, analytics, testing, and implementation.

TECHNICAL SKILLS

Product & Delivery: JIRA, Miro, Agile, Scrum, Product Discovery, PRDs, User Stories, Acceptance Criteria

AI & Automation: Generative AI, LLM Workflows, AI Evaluation, Human-in-the-Loop Systems, Workflow Automation, RAG Concepts

Data & Analytics: SQL, Python, Microsoft Excel, Product Analytics, Instrumentation

Design & Prototyping: Figma, Adobe InDesign, Canva

Development & Deployment: TypeScript, React, Next.js, Streamlit, APIs, Git, Vercel

Productivity: Excel, Google Workspace, PowerPoint

KEY SKILLS & CORE COMPETENCIES

AI Product Management | Product Strategy | Product Discovery | Product Execution | Product Operations | Generative AI | AI Evaluation | Workflow Automation | Product Analytics | Stakeholder Management | Cross-Functional Leadership | Program Delivery | Risk Management | Agile & Scrum | EdTech

EDUCATION

MBA	Sep '19 - Jan '22
Liverpool Business School	
Business Analyst (UpGrad)	
Bachelor of Life Science	Jun '14 - Sep '17
University of Delhi	New Delhi, IN
• Secured A Grade	

PROFESSIONAL EXPERIENCE

Physics Wallah Pvt. Ltd	May '23 - Present
AI Product Manager	Greater Noida, Delhi-NCR, India
- Own product discovery, strategy, requirements, UX workflows, testing, and delivery for AI-enabled EdTech and internal operations products used by faculty, managers, and content teams. - Initiated and led the AI Video Solution Generator, designing a 7-stage, human-in-the-loop workflow connected to a question-bank ecosystem containing 1.8M+ questions. - Led product development for a Workforce Operations Platform covering attendance, timesheets, assignments, approvals, productivity analytics, reporting, and role-based access. - Designed and built workflow-automation tools for question ingestion and taxonomy tagging and spreadsheet-to-PowerPoint performance analytics, reducing manual operational effort while preserving human validation.	
Unacademy	Apr '21 - Apr '23
Associate Product Management & Operations	Greater Noida, Delhi-NCR, India
Product Management	
- Managed and mentored 10+ subject-matter experts while coordinating 7+ concurrent initiatives across interactive digital-learning books (Fundabox) products. - Managed roadmap execution for a 1,086-item 3D model pipeline, covering requirements, ticketing, delivery, quality review, approval, and platform ingestion.	

- Supported product validation with **300+ participants**, using feedback and review data to prioritize improvements that contributed to approximately **30% higher engagement** and a **20% improvement in content quality**.

Yami Cosmo Services Pvt. Ltd

Jun '19 - Mar '21

Associate Product Management & Operations

New Delhi, India

- Led product and operations planning across service delivery, customer experience, workflow improvement, and cross-functional execution.
- Improved service and account-management processes, contributing to approximately **60% higher client retention** and **40% year-over-year revenue growth**.
- Reduced operational costs by approximately **30%** by standardizing workflows, improving resource coordination, and removing process inefficiencies

BYJU'S

Jul '17 - Jun '19

Content Strategist (Product Support)

Noida, Delhi-NCR, India

- Designed structured content-production workflows incorporating documentation, validation, quality-control checkpoints, and release-readiness reviews.
- Contributed to an approximately **30% improvement in course completion** through content strategy, learner-focused improvements, and consistent quality standards.
- Collaborated across academic, content, production, and product-support teams to deliver and maintain scalable digital-learning experiences.
- Enhanced the learning journey through **gamified elements** such as quizzes, interactive activities, and knowledge checks.

- Languages:** Tamil (Native), Hindi, English
- Interests:** Cycling, Music and Cricket

AI PRODUCTS & PRODUCT LEADERSHIP

AI Video Solution Generator | AI Product Manager | March 2026–Present
Human-in-the-loop educational content automation

- Initiated and led a **7-stage AI workflow** spanning source extraction, solution generation, narration, video rendering, faculty review, and final output.
- Owned discovery, requirements, UX workflows, AI/model decisions, evaluation, and product validation; contributed directly to implementation through AI-assisted development.

Workforce Operations Platform | AI Product Manager | June 2026–Present
Role-aware workforce management and productivity platform

- Initiated and defined a platform for faculty, managers, and operations users covering attendance, timesheets, projects, approvals, reporting, and productivity workflows.
- Owned requirements, workflow architecture, UI/UX, data relationships, AI-enabled functionality, testing, and validation while contributing directly to the TypeScript implementation.

QPG Tagging Automation | AI Product Manager | August 2026–Present
Controlled question-ingestion and taxonomy automation

- Designed an end-to-end workflow for DOCX/PDF question ingestion, taxonomy-based tagging, validation, and bulk video-solution attachment.
- Introduced preview, dry-run, human approval, and explicit write controls to prevent unauthorized AI-generated tags and protect data quality.

Leaderboard Generator | AI Product Manager | August 2026–Present
Spreadsheet-to-presentation performance analytics

- Initiated, designed, and built a Python/Streamlit product that converts variable spreadsheet inputs into editable PowerPoint analytics and ranking reports.
- Implemented schema handling, ranking and tie logic, presentation modes, batch processing, and automated output validation while keeping student data local.
